MARYLAND TOBACCO QUOTA SET FOR FEBRUARY 2

Acting Secretary of Agriculture True D. Morse today proclaimed a national marketing quota for the 1960 crop of Maryland tobacco and set Feb. 2 as the date for a growers' referendum on quotas for the next three Maryland tobacco crops.

The quota of 42, 360,000 pounds announced today, converted to acres, results in 48,858 acres available for allotment in 1960. Acreage available for allotment in 1959 totaled 48,409 acres. The 48,858 acres include a small acreage to be held in reserve for establishing allotments for farms that have not grown Maryland tobacco during the past five years, for correcting errors, and for adjusting inequities. For most farms, 1960 allotments will be the same as in 1959.

If at least two-thirds of the Maryland tobacco growers voting in the Feb. 2 referendum favor marketing quotas, they will be in effect for the 1960, 1961, and 1962 crops, and tobacco produced in excess of the farm allotment will be subject to a marketing penalty of 75 percent of the average market price for the previous marketing year. As directed by present legislation, Maryland tobacco prices would be supported at 90 percent of parity if marketing quotas are in effect.

If quotas are disapproved by more than one-third of the growers voting, the quotas will not be in effect, no penalities will be collected on markedings during the 1960-61 marketing year, and no price support may be made available. In that case another referendum would be held next year on quotas for the next three crops.

In the last Maryland tobacco quota referendum held Feb. 24, 1959, the vote for quotas for the 1959, 1960, and 1961 crops was only 64.2 percent of the 5,021 growers voting—less than the two-thirds majority necessary to keep quotas in effect.

Maryland tobacco is grown principally in southern Maryland, with smaller acreages in Virginia, Tennessee, Kentucky and Delaware.
